Container

**AI Based Visual Inspection** for Modern Industries

# Do Your Operations Face These Challenges?

High Costs from Manual  
Checks

Limited Visibility in Logistics

Errors in Data Capture

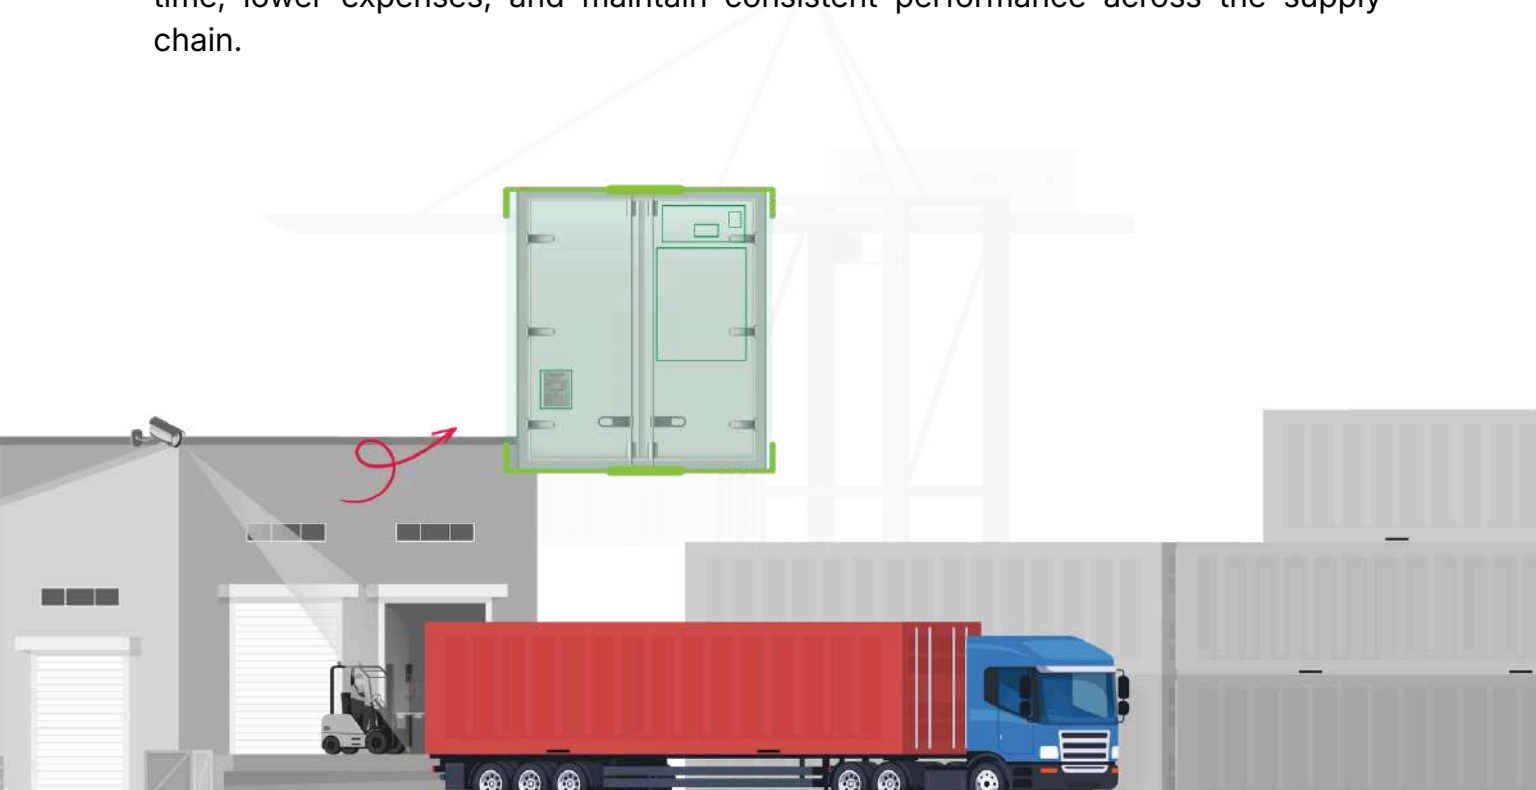

Delays in Yard Operations

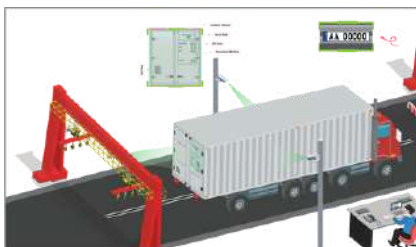

## Monitor, Automate, and Control Container Flow with Precision Tools

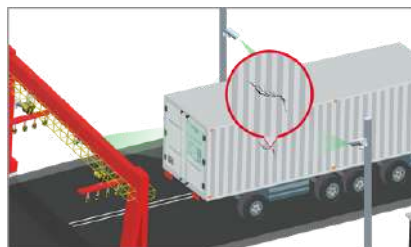

Gotilo Container advances container operations by using code recognition, automated yard functions, and continuous tracking. It minimizes errors in recording, improves the handling of containers through structured workflows, and delivers reliable information to support timely decisions. This helps reduce idle time, lower expenses, and maintain consistent performance across the supply chain.

## Core Capabilities

ISO 6346 Container Code  
OCR

Container Damage  
Localization

Container ID-Based  
Tracking

Multi-Object Vehicle Tracking

ANPR - Automatic Number Plate Recognition

## Comparative View

### With Manual Container Tracking

**VS**

### With Gotilo Container

- ✓ Reliance on paperwork and manual entry of data
- ✓ Frequent mistakes in recording container numbers
- ✓ Slow updates leading to congestion in yards
- ✓ Limited visibility of container position and movement

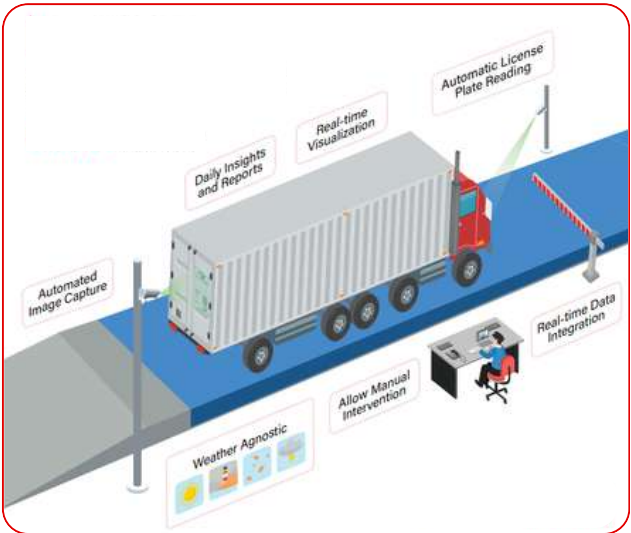

- ✓ OCR scanning provides accurate container identification
- ✓ Automated yard processes reduce manual workload
- ✓ Continuous, real-time view of container activity
- ✓ Integrated system intelligence for faster logistics decisions

# Automatic Container Details Identification

## Event Log

| Sr.no | Container ID  | ISO Code | Time     | CSC Plate | Size     | Hazardous |
|-------|---------------|----------|----------|-----------|----------|-----------|
| 1     | OOLU 102558 8 | 2201     | 11:30 AM | Present   | 20ft Dry | No        |
| 2     | VSLU 145627 8 | 45G1     | 12:15 PM | Present   | 40ft HC  | Yes       |
| 3     | TGHU 759933 0 | 45G1     | 12:35 PM | Present   | 40ft Dry | No        |

## Solution

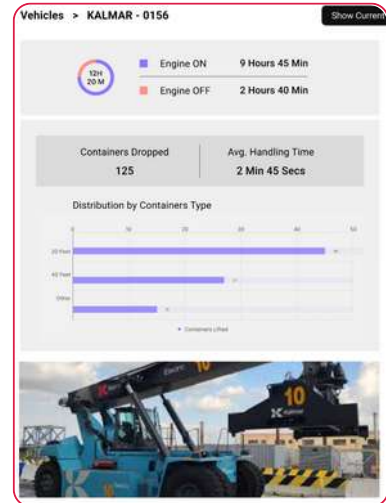

Developed a Computer vision-based Container details identification solution that identifies the container info in real time.

# Automatic Container Details Identification

## Vehicle Tracking Map View

## Individual Vehicle Statistics

## Solution

### Real-Time Monitoring with GPS:

We developed a solution to track all machines and forklifts continuously using GPS to reduce delays and smoothen container handling.
